

Pairs League – Masterpoints

Based on 4 divisions of 10 pairs, all play all playing 8 board matches

Masterpoints are issued

- To the top three pairs in each division (including any substitute pairs)
- For each match won or drawn by each particular pairing
- There is a scale for each division as below

	Div 1	Div 2	Div 3	Div 4
1 st place	99	83	66	50
2 nd place	66	56	44	33
3 rd place	33	28	22	17
Per match won	24	20	16	12
Per match drawn	12	10	8	6

So for example

If Pair 8 won the division 2, playing in 2 of the three sessions (winning 5 matches) and with a substitute pair playing in the third session (winning 1 match, drawing 1 match), then

- the main pair would receive $83 + 5 \times 20$ masterpoints
- the substitute pair would receive $83 + 1 \times 20 + 1 \times 10$ masterpoints

If Pair 5 won Division 4 with player A playing with player B in 2 sessions, winning 5 matches, and with Player C in 1 session, drawing 2 matches, then

- Player A would receive $50 + 5 \times 12 + 2 \times 6$ masterpoints
- Player B would receive $50 + 5 \times 12$ masterpoints
- Player C would receive $50 + 2 \times 6$ masterpoints

If pairs 4 and 6 tied for second place based on their total VPs in division 1, with pair 4 winning 6 matches and pair 6 winning 7 matches then (assuming no substitutes)

- pair 4 would receive $(66 + 33) / 2 + 6 \times 24$ masterpoints
- Pair 6 would receive $(66 + 33) / 2 + 7 \times 24$ masterpoints
