The winners is the player who has the lowest total for their best 6 Handicap Events with the condition that at least 1 counting score is achieved with an alternative partner.

Scores shown in Green are with first different partner. Highest Scores in Yellow were not counted

The closeness of the result shows that the handicap system is working well.

22 Members qualified and players of all standards were in the running right until the last round.

Handicaps for all players will be adjusted next year to try to provide an equal chance of winning.

The Competition next year will be based on the best 6 average handicapped percentages (not position)

so that the results can be calculated automatically as the event proceeds by Bridgewebs.
(This is unlikely to affect the overall result but will reduce the workload and provide up to date standings.)
