

## **Increase in average percentage over the club year.**

This is the first time that we have attempted to compare players' percentages through the year.

There were 11 evenings when we played pairs during May, June and July 2015; we have averaged out each player's percentages over those evenings provided they played 4 or more of those evenings.

There were only 8 evenings when we played pairs during January, February and March 2016; to increase this number the evening of 1<sup>st</sup> April was also included - so 9 evenings. We have averaged out each player's percentages over those evenings provided they played 4 or more of those 9 evenings.

Since this is all percentages there will be some people like - the chairman – who had negative improvements when comparing the later results with the earlier but there were some who improved their average percentages.

**Increase in average percentage comparing early 2016 with summer 2015**

Subie Fonseka	5.07%
Paula Ollive	3.70%
Margaret Sawyer	3.51%
Julia Lee	3.51%
