

Counting and Arranging

Count your points as you arrange your hand. Count them again after the hand is arranged. Hidden cards pop up at the most damaging time. Count your cards and points with your eyes, not your fingers or lips.

Keep colors sorted i.e. black-red-black-red. Put singletons or doubletons in the middle of your hand. Don't put honors on the ends. Keep your hand behind the edge of the table.

Do not pull a card before it is your turn. Try not to pull a card and then change your mind and pull another one. Now everyone knows you have more than one card in a suit and also that you are not sure what to play. Play with confidence!!
