

# The York Bridge Club (Artist Impression)

Planning consent granted- 6<sup>th</sup> April 2020  
Negotiations completed and contracts  
signed – Dec 2020

The journey begins – January 2021  
First turf removed, foundations started

As the foundations are completed, the scale of the building becomes more apparent

Footings completed and preparations made for the sub floor (Nick our architect checking levels)

As the walls emerge, the outline of the offices and team rooms begins to show

Work on the new pedestrian path begins

Preparations for the concrete subfloor

Preparing the floor

Matt (EK Build) keeping a watch over the  
(ground) worker

Sub floor completed

1 from entrance way      2 from Kitchen (starring Stuart)

And now for the roof

Rafters ready for boarding out

Roof showing elevated section.  
Now boarded for waterproofing

Waterproofing complete and photovoltaic cells (solar panels if you prefer) being installed

---

Looks different inside now

A large room with concrete walls and windows is shown. The floor is covered with a black plastic membrane. A network of white plastic pipes is laid out in a serpentine pattern across the floor, representing an underfloor heating system. The pipes are held up by small black spacers. The room has several windows and a door in the background, and a concrete pillar is visible on the left side.

Underfloor heating goes in

Ventilation in, flooring complete.  
View through playing area towards entrance (Mark & Stuart star)

Wiring and plastering started

Some painting underway but windows still awaited

Outside, work starts on paths and carpark

New paths complete the step free access for all entrances  
(Main entrance on left, plant room on right)

Carpark fully tarmacked

One of the team rooms (left) and the office (right)

Views across the playing area with good light and views.

Foyer to the toilets.  
2 disabled and a  
separate ladies &  
gents

Kitchen & Seating area.  
From main entrance (L) and  
showing serving hatch and doorway from playing room (R)

After months of delays the windows finally arrive

New front doors are fitted and the carparking is completed with electric vehicle charge points and marked disabled bays

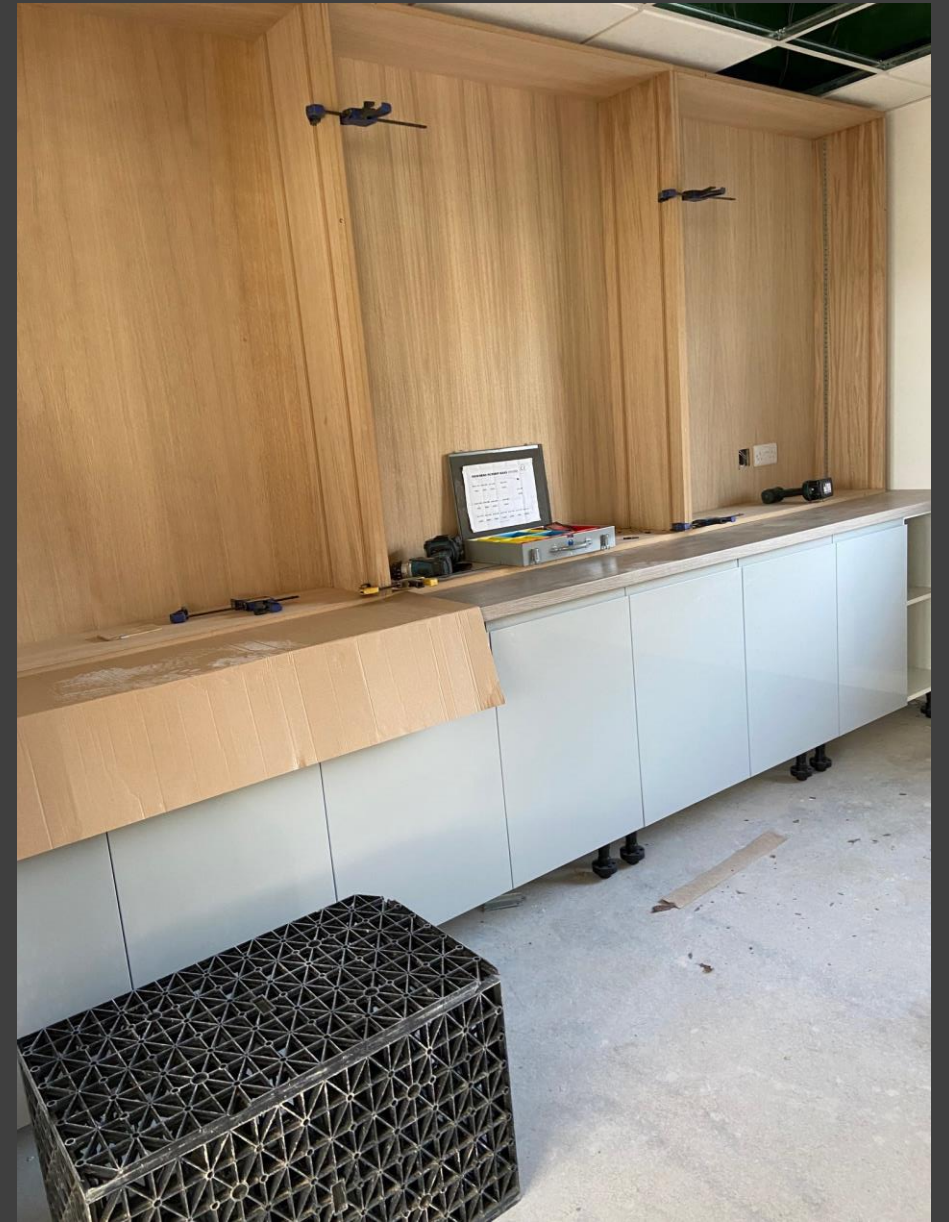

The next hurdle is cleared – mains water is connected at last

And plumbing can be finished to enable underfloor heating to be switched on

The fit out of the kitchen  
and office starts

Decorating is completed and fitting of internal doors starts

The wait is almost  
over
