

Thank you for awarding me the Junior Master Status this week. I have enjoyed playing cards and bridge for a long while. As a young child I sat in the laps of my parents and grandparents while they played bridge. I love playing duplicate bridge with friends in several bridge clubs. I think bridge is a good way to use your brain and improve your mental status. Recently a friend invited me to play bridge at our local Jackson Bridge House. It was enjoyable being with old and new friends. Now since coronavirus has come, our local bridge center is closed.. We received an email informing us of the virtual club games online. We have enjoyed playing with friends and others from our Jackson Bridge Center. What fun we are having playing 2-3 times a week. It really has helped to keep us busy while we are in the stay home situation. Thank you for this opportunity . I look forward to playing again at the Jackson Bridge House soon.
