

I got the last of my points for this level by playing on BBO, many times for our club, but also in Speedball and Individual games. I commend the ACBL and BBO for their work to keep the game going despite the unfortunate events of 2020. While it is sometimes "interesting" to play with someone who is half way across the world, I have found it to be a learning experience. Bridge is one of those games that for the most part has a "language" that can be understood, no matter where you are from. I am still playing with friends I made when I first got on BBO about 14 years ago - one as close as Iowa and one as far away as South Africa, and one who turned out to be a good friend of my cousin in Indiana. It is indeed a small world.
