

Covid-safe Conditions of Play Summary

- Do not come to play if you have any Covid symptoms. Go and get tested instead.
- You must be **double-vaccinated** (or have a valid medical vaccination exemption*) and you must be able to produce valid and authentic documentation of your vaccination status.
- You must submit to a body temperature check.
- You must check-in using the Service Victoria app.

Until further notice will also continue to follow our Covid-safe playing measures...

- Sanitize hands between rounds
- North handles the cards, South handles the Bridgemates
- Sanitize chairs and tables at end of session, etc.

*Members should note that the club cannot refuse entry to a member that has a valid and authentic medical vaccination exemption certificate. This means that any given session may have persons in attendance who are not double-vaccinated. You should keep this in mind when deciding whether or not to play.

That said, the overwhelming majority of our members have produced proof of double-vaccination and (apart from mask wearing) our other Covid-safety measures – as outlined above – remain in place.
