

Rugby Village Bridge Club
20th July 2020 Second Face to Face Session
Screen Wrangling

We had our second face to face session Here's one of our three tables set up ready to go.

North's own set of boards is on the table next to the seat, and a packet of disposable face coverings, though all our players

have worn their own so far.

Yesterday morning we went and bought two Hardwood Plywood 12x606x1220mm boards.

We then repaired all the cracked screens with wide sellotape.

These boards are smaller than the screens (bigger ones were much bigger!), but they worked well. We could put four screens (two tables worth) on each board and make sure we lifted the whole pile by getting our fingers onto the boards underneath. We could carry this much easily, and we could load and unload them into the car.

We put the screens very close to the playing tables and were extremely careful lifting them individually to set them up.

No more breakages!

We have a theory that the mended ones are slightly stronger. None of the mends prevented playing at all.

All the best
