

Using RSVP Bridge Like an App

RSVP Bridge is not an app that you will find in the App Store or in Google Play. Rather, you visit our website on your phone and install it directly.

Is this safe? Yes! When installed this way, the app does not have any more permissions than visiting a website does. But it does make using RSVP even easier.

Once installed, you will see our icon on your home screen. It is also a good idea to return to your browser and close any tabs that have RSVP Bridge open.

How to Install RSVP Bridge as an App on iPhone

Step 1: Open Safari

Open your web browser—use Apple Safari for best results. Go to www.rsvpbridge.com.

Step 2: Tap the Share Button

Look at the toolbar at the bottom of your screen (if the toolbar is hidden, scroll up slightly on the page). Tap the Share button (the square icon with an arrow pointing straight up). This might be hidden under a ... icon.

Step 3: Select "Add to Home Screen"

A menu will appear. If 'View more options' is shown, tap that. Scroll down through the list of options past your contacts and messaging apps, and tap "Add to Home Screen".

Step 4: Confirm the Name

A final screen will show the RSVP Logo and name. Tap "Add".

The app is now installed and will appear right on your main phone screen alongside your normal apps!

How to Install RSVP Bridge as an App on Android

Step 1: Open Chrome

Open your web browser—Google Chrome is highly recommended and go to www.rsvpbridge.com.

Step 2: Look for the Install Prompt

Depending on your phone's software version and browser settings, look for one of the following prompts:

- **The Banner:** A pop-up bar may automatically appear at the bottom of your screen saying, "Add RSVP Bridge to Home screen". Tap it.
- **The Address Bar:** Look for a small computer icon with a down arrow inside the web address bar at the top and tap it.
- **The Menu:** Tap the three dots menu in the top right corner of Chrome. Look down the list and tap either "Install app" or "Add to Home screen".

Step 3: Confirm the Installation

A final confirmation box will pop up. Tap "Install" or "Add".

Can't Find the Icon After Installing?

If your phone says the app was installed but you do not see the icon on your main screen, don't worry—it is on your phone.

1. **Open your App Drawer:** Go to your phone's main screen and swipe up from the bottom (or near the bottom) to open the master list of all your apps.
2. **Search for it:** Use the search bar at the top of the app list to type the name of the app or scroll through alphabetically to find it.
3. **Move it to the home screen:** Press and hold the app icon. A small menu will pop up. You can either tap "Add to Home" or simply hold down and drag the icon up to place it exactly where you want it.
