

New click and tap options for bidding and play

The former two-taps method has been replaced with two separate options aimed at the different ways that tablets and laptops are used.

iPads & Tablets

Double-tap (tablet style) now emphasises the bid or card when selected with a single tap, as seen below. Tap the bid or card again to play. Tap elsewhere to cancel.

Laptops / PCs

Double-click (mouse style) emphasises a bid or card when the cursor is moved over it. **Two fast clicks** are required to play a bid or card.

Any input style can be used on any device. For example, a desktop user can use tablet-style double-tap. The names are simply suggestions.

Log-in twice

If a player is already logged in and happens to log in again elsewhere, with the same name (or the same combination of name and id), the earlier instance of their login will close. The latest login becomes the only login. The reason for this is that some people were logging in multiple times unnecessarily.
