

# Bridge Base Online Friend Setup

---

## BBO FRIENDS

When you are on BBO you will find it very useful to list all OBC BBO Members as "Friends" as this will enable you to see if they are on the site.

Log on the site, then click "People" which is on the right hand side of the page (its at 90 degrees to normal reading) Then click "Add a Friend" at the bottom of the page - it is greyed out but changes to blue when you click on it. Then add the OBC BBO names to the list. You can click "Show Offline" to check who is on your list however they will appear automatically if they are already on BBO.

**You can use the "people" list to copy and paste the individual names into the N S E W positions on the table setup. If you right click on the name in the "people" tab you get some options.**
