

# Install Bridge Solver Online in Chrome

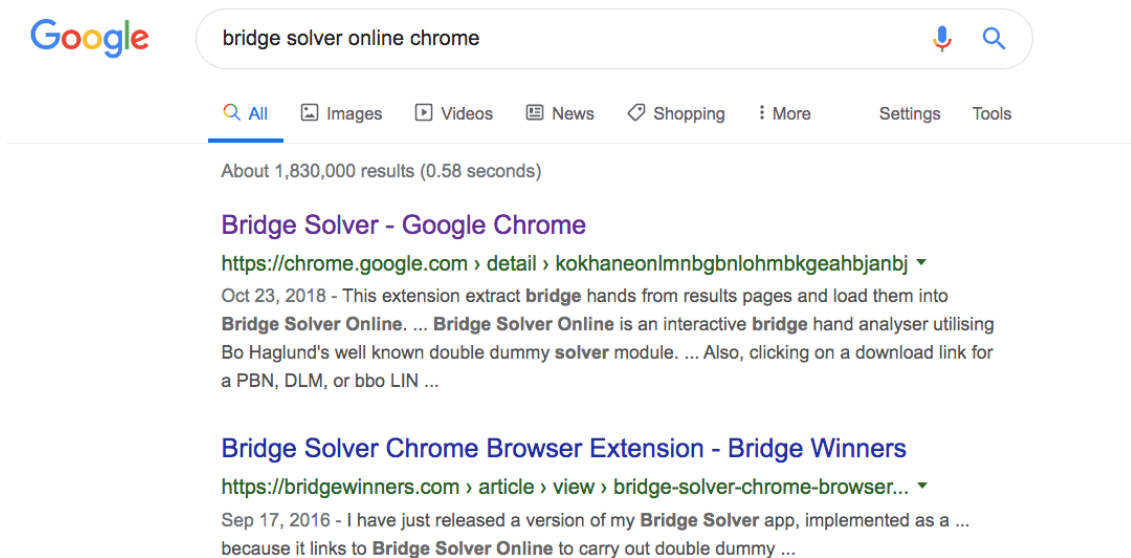

This is 2-step task, ridiculously simple ... if you already have Chrome installed, skip step #1:

## INSTALL CHROME

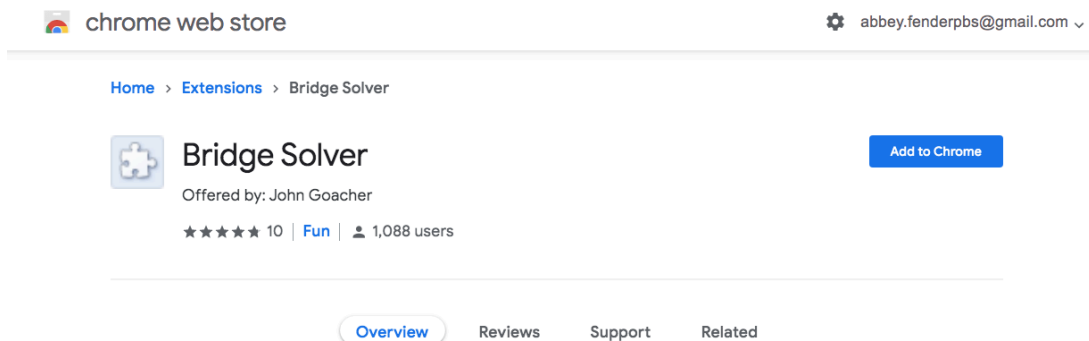

1. Open another web browser
2. Enter search words "download chrome" (you do not have to go to google's search engine to do this, simply enter in the browser address bar)
3. Download the software then install

## INSTALL A CHROME EXTENSION

1. Open Chrome
2. Enter the text "bridge solver online chrome" and press Enter. You will then see a screen resembling:

3. Click the appropriate link to present a screen similar to:

4. Click **Add to Chrome** and answer questions from the installer
5. You will then see the icon in the top right of the Chrome window:

6. Click the icon to get started whenever you want:

**Bridge Solver Online:**

Input Hand **OR** browse to PBN, DLM, or bridge base online LIN file : Choose File | No file chosen

**Alternatively**, to load a hand directly from a bridge results page, navigate to that page in the google chrome browser. If the extension detects one or more bridge hands on the page the bridge solver icon at the right hand side of the address bar turns green. Clicking on the icon will then read hands from the pages and upload them into Bridge Solver Online. Also, clicking on a link to a PBN file in a web page will download the file and then upload it to Bridge Solver online. Version 0.2 upwards will also handle links to DLM files and bridge base online LIN files.

The extension can detect and read hands from the following types of result page:

- [ACBL Common Game](#)
- [ACBL Live](#)
- Various ACBL results page formats
- [Bridge Base Online Vugraph Archives](#) (reads hands from the BBO Hand Viewer)
- [BBO Online Tournaments](#) (from the BBO Hand Viewer)
- [BridgeWebs](#) (although the results pages are already directly linked to Bridge Solver Online)
- Pianola hosted sites (no club list available)
- [English Bridge Union Sim Pairs](#) (already directly linked to Bridge Solver Online)
- [ECats Bridge Sim Pairs](#)
- [vugraph.com hosted sites](#)
- [bridge-club.org hosted sites](#)
- [altosoft.com.au hosted sites](#)

7. If you need help with this, google something like “how to install bridge solver online in chrome”
