BCL Tips

Table Etiquette - in the 'ChatIn' window

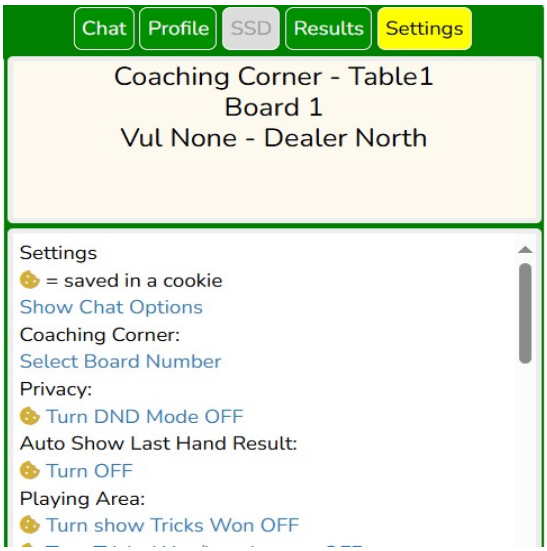
typ - thank you partner
wpp - well played partner
vwpp - very well played partner
wpo - well played opposition
hlp - hard luck partner
hlo - hard luck opposition
brb - Be right back (usually by dummy when going for a coffee)
tu, tnx - thank you
lol - laugh out loud

Showing the Tricks won above the Playing Area

Whilst the Tricks won are shown in the top RH top corner

It is sometimes convenient to have them also showing above the Playing Area e.g.

To achieve this, find the **Playing Area** controls under Settings



and change the status from

to

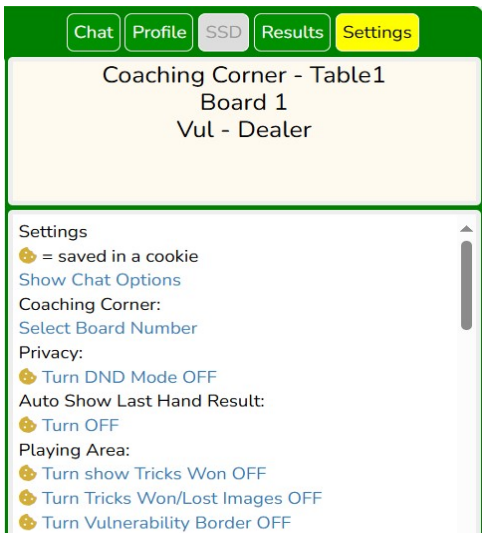
Showing Vulnerability

Whilst the Vulnerability is shown in the top RH top corner

It is also convenient to have it showing as a coloured border around the Playing Area e.g.

In the above example neither side is vulnerable.

To achieve this, find the **Vulnerability Border** control under Settings

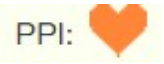


and change the status from

to

The above example shows that N-S are non-vulnerable and E-W are vulnerable

Simple Overview of Ratings (PPI)
e.g.



The PPI (Past Performance Indicator) is the estimated percentage score that a player would expect to average.
Card symbols in a BCL member profile indicate their standard.

♠ PPI over 55% (16% of BCL members)
♥ PPI from 51% to 55% (25% of BCL members)
♦ PPI from 46% to 51% (33% of BCL members)
♣ PPI below 46% (26% of BCL members)

The rated rooms are Daily MPS, Improvers Tourney, OPEN Individual, SUN Individual and Swiss Pairs League.
