In a separate note I have recommended a number of Andrew Robson's excellent bridge books - easy to read, inspirational, and a vital resource for any bridge player wishing to progress.

If you prefer to watch and listen rather than read, then I recommend these fantastic DVDs. **Learn Bridge** (two discs) has been a staple for my beginners for many years, and for anyone looking to progress beyond the very basics then you need **The Next Level** series (six discs). Andrew's teaching style is very welcoming, and a vital feature of the DVDs is that most lessons are only five or six minutes in length - and yet he still manages to get across everything he needs to say about the topic!

You can see sample lessons at this online location:

And you can buy them as individual lessons to download, or as full sets, from:

And if you want to try before you buy, why not borrow a club copy? They come very highly recommended!
