BrIAn Level 2 Teams Scoring

Level 2 Teams is scored in VP's but BrIAn needs to convert IMPS to VP's as below.

BriAn will assume total IMPs but you can get it to use VP'S as follows:
 - Import the USEBIO into BriAn on Website as usual using wgc6

 - Start up the ==app== and log in as Director
 - Game settings->Scoring
 - VPs -> "Standard scale"
 - Save.

Now you can finalize and publish as normal back on the Website and the results should be exactly the same as RealBridge.
